PROTECTING YOUR DOCUMENTS & FILES

Are you prepared for the unexpected?

How would you cope with unforeseen disaster - flood, fire, or RANSOMWARE attack? What if you inadvertently deleted important documents and files? Have you thought about how this would affect you? We have.

Managed Backup Documents protects your documents & files, minimizes the possibility of loss, and keeps you functioning by:

- Providing an ultra-secure Document Backup service

- Giving you quick, flexible access to data - when you need it

- Providing support to get you up and running if the worst happens

- Offering a low-maintenance, low-cost easy-to-use solution

We'll keep you connected to your data - whatever happens - and more importantly, we'll give you peace of mind. Priceless.

THE SOLUTION

We'll provide the protection your information needs. One solution for disaster recovery, backup, and critical document protection.

No more worrying about document protection. Managed Backup Documents protects against the risk of lost productivity when disaster strikes in the form of deleted, encrypted, or lost files. This service is available as an add-on feature to the Remote Monitoring and Management services offered by jmrDesign LLC.

For very low cost, this service will automatically create and store up to 56 backup sets into the cloud over a 28-day period. Then if restoration of any files becomes necessary, jmrDesign can quickly retrieve the affected files and replace them onto the target system remotely. This recovery process can be executed within minutes depending upon how many files must be processed. An unlimited number of files can be backed up at no additional cost.

How does it work?

After initiating the Managed Backup Documents service, jmrDesign will remotely install a software agent on the target system which will begin scanning the system to send the first backup set to the cloud. Subsequent backup sets are created twice each day if the system is connected to the Internet. The entire process is transparent to the target system user.

Any file restoration services are billed separately.

What files are protected?

A primary benefit provided by the Managed Backup Documents service is that of the automatic scanning it does in the background twice each day creating up to 56 unique backup sets over a 28-day period. The file types that are backed up are shown in the table below.

File Types Automatically Scanned and Backed Up

File extensions	File type name
CSV	Comma-separated values file
DOC, DOCB, DOCM, DOCX	Word document
DOT, DOTX	Word document template
KEY	Keynote presentation
NUMBERS	Apple Numbers application file
ODC	Office data connection file
ODF	Apache OpenOffice math file
ODG, ODP, ODS, ODT	OpenDocument drawing, presentation, spreadsheet, & text
PAGES	Pages document
PDF	Portable document format file
POT, POTM, POTX, PPAM, PPS, PPSM, PPSX, PPT, PPTM, PPTX, SLDM, SLDX	PowerPoint presentation, slide show, and template
PUB	Microsoft Publisher publication
RTF	Rich text format file
TXT	Plain text file
WBK	Word backup document
WPD, WPS	WordPerfect and MS Word document
XLA, XLAM, XLL, XLM, XLS, XLSB, XLSM, XLSX, XLT, XLTM, XLTX, XLW	Excel files
XLR	Microsoft Works spreadsheet
XPS	XML paper specification file

How can I have my system protected?

Getting your data protected is easy. There is no hardware to install and no training required. A special software agent is installed remotely onto the target system and within hours begins the process of performing backups twice a day. This inexpensive protection is also easy to maintain.

Contact jmrDesign LLC and we will get you started in no time.

Managed Backup Documents could benefit you and your business. If you agree, get in touch with us now.
